PROFILE

I am an eager multidisciplinary graduate of Nottingham Trent University, seeking the opportunity to apply my skills in the real world. I am dedicated to my craft of interfaces and coding, looking to hone my potential in a programming-orientated role. I am experienced in multiple languages including HTML/CSS, JavaScript, C++ and more. I have furthered my skillset to include both web development and design, through self-teaching on personal projects.

ADDITIONAL INFORMATION

Languages – Hindi; Punjabi; Urdu

Learning Disability – Dyslexia

INTERESTS

I mainly play football on the weekends; this has allowed me to develop my team-working and communication skills, as well as boosting my leadership qualities as I am the captain and have responsibility over the team. I also enjoy reading novels on my phone, expanding my creative thinking alongside improving my reading and comprehension abilities.

Currently I have a few personal projects ongoing. These include: android app development for a WhatsApp clone, video editing for potential YouTube intros, designing logos in Adobe Illustrator for recreational purposes and, finally, animating and rendering these logos using Adobe After Effects. I have most recently been taking a course for web development on Udemy to further my existing knowledge, as I aim to create my own website to showcase my portfolio.
